

Information about handling the coronavirus

The health of our participants and employees is a top priority for Audi. We therefore observe the official guidelines and recommendations at our events and supplement these where needed with additional measures.

Currently, Corona access restrictions do not apply for Audi driving experience events. Please note that restricted access directed by third parties for some race tracks might occur any time, so please note the current participation requirements for your training.

In some countries, however, 3G-status or registration may still be required upon entry. For events as part of the Audi tour experience, the respective corona and entry regulations of all countries to be visited apply. Please note any entry and coronavirus regulations at the relevant event location that may apply when you attend the training course, as well as your country's return travel requirements.

In addition, we ask you to observe the generally applicable rules, such as e. g. appropriate distance and thorough hand washing. We also recommend wearing a face mask.

Note: The rules may be adjusted depending on current circumstances.

Group size: Group sizes and number of participants adjusted based on official requirements.

Distancing: The seating arrangements in the conference and briefing rooms as well as in restaurants are based on official requirements.

Hand sanitiser dispensers are located at the entrances of our event locations.

Face masks: We recommend wearing a face mask, especially if the recommended minimum distance of 1,5 meters cannot be maintained.

Exception: at Events where helmets are used, we **recommend** wearing a face mask.

Please check the following points before participating in an Audi driving experience event:

- Has the health authority ordered you to undergo an official quarantine?
- Has the health authority ordered an official quarantine in your immediate surroundings (e.g. family member or other contact person)?

- Have you had flu-like symptoms in the last 48 hours such as fever, coughing, difficulty breathing, frequent sneezing, a heavy cold, painful limbs or a severely impaired sense of taste or smell?

If you answered “yes” to at least one question, we must ask you to contact Audi driving experience and refrain from participating in the event.

If you unexpectedly experience flu-like symptoms while participating in an Audi driving experience event, please report this immediately to the event personnel (instructors and/or event support) and stop participating in the event. The employees of Audi driving experience will introduce further measures accordingly.

If you are found to be infected with the coronavirus after the event, please give the health authorities the email address drive@audi.de or the telephone number **+49(0)841 89 32900** so they can contact us and determine any other persons who may have come into contact with you during the event.

We care about your health – help us protect it.

Wash your hands thoroughly – for at least 20 seconds

Wash your hands with soap several times a day and take your time when doing so. Avoid touching your mouth, eyes and nose.

Avoid shaking hands

We prefer to offer you our brightest smile and hope you will return it. This is a nice way for us to protect each other.

Coughing – please practice good hygiene

Keep your distance from others when coughing and sneezing. Cough into the crook of your arm, not your hands.

Paper tissues – the better choice

Use paper tissues only once and dispose of them quickly.

Keep a distance – at least 1.5 metres

We recommend a minimum distance of 1.5 meters. How to protect yourself and others.
